

U.S. Physicians Only:

Biosense Webster has voluntarily committed to the FDA to provide an appropriate training program for all EP physicians. To be eligible to purchase the THERMOCOOL Irrigated Tip Catheter*, each physician intending on using the product must complete an approved Biosense Webster training.**

If you wish to complete your training online, please complete the course below and follow the instructions on how to become eligible to purchase the THERMOCOOL Irrigated Tip Catheter.

Instructions on How to Become Eligible to Purchase the

THERMOCOOL Irrigated Tip Catheter

Step 1 – Complete the Training

Take the "Advanced Ablation Mastery Course." This one and a half hour video, which overviews the biophysics of ablation, may be accessed on the Professional Education page.

Step 2 – Become Certified

Download and print the Online Training Certification form from the ThermoCool Featured Product page or the Advanced Ablation Mastery page.

Once you have done this, please complete and sign the certification form. This form needs to be faxed back to Biosense Webster (instructions are located on the form).

Step 3 – Become Activated to Order THERMOCOOL Irrigated Tip Catheters

Once your certification form has been received and processed by Biosense Webster, your sales representative will contact you to let you know that you can now place orders for the THERMOCOOL Irrigated Tip Catheter and the COOLFLOW Pump. At this time, your local Biosense Webster representative will work with you to schedule your first THERMOCOOL Irrigated Tip Catheter cases.

**Please note that this product is approved for Type 1 Atrial Flutter.*

***Contact your local Biosense Webster Representative for complete details.*
