COMMON MODIFIERS

-22	Increased procedural service (submission of report / documentation required)
-26	Professional component
-52	Reduced services (portion intentionally omitted at physician's election)
-53	Discontinued procedure (terminate without completion – physician claims)
-59	Distinct procedural service (separately identifiable)
	-XE Separate Encounter
	-XS Separate Structure
	-XP Separate Practitioner
	-XU Unusual Non-Overlapping Service
-73	Discontinued procedure prior to administration of anesthesia (OP facility)
-74	Discontinued procedure after administration of anesthesia (OP facility)

Notes:

- Procedures identified with a + symbol preceding the code are designated “add-on” codes; may not be reported stand-alone. Bill in addition to the primary service or procedure.
- Many of these codes require modifier -26 on physician claims when performed in a facility setting (eg, hospital inpatient or outpatient).

Please list catheters / supplies used and include a product catalog number to reference in assigning a C-code, if applicable.

PRODUCT CATALOG NUMBER / DESCRIPTION

Please note that not all products or supplies will have an associated C-code. There is no C-code for: REFSTAR® Catheter with QWIKPATCH® External Reference Patch, COOLFLOW® Pump Tubing, PERRY® Exchange Dilator, or HeartSpan® Transseptal Needle, as these are considered by CMS to be accessory items. If none is defined, the facility will assign an internal charge code associated with an appropriate revenue code.
